This two-hour walking tour with guide Dana Levine begins and ends at 46 B State St. at the Charleston Culinary Tour Office. This SINHG trip is all about the woodlands and wetlands right here off Seabrook Island's coast. Laurida Rapp from the Barrier Island Environmental Educational Center at Camp St Christopher will guide us through this tour. We will walk through the Maritime Forest exploring the Flora and Fauna of the woods while visiting the Slough (freshwater wetland) and making a stop at the dock in the Salt Marsh. We will learn what wetlands look, feel, and smell like as we explore a salt marsh and freshwater slough. This tour will emphasize the interrelationships between the maritime forest and wetland ecosystems. The walk is approximately 2 miles round trip. We will be meeting at St Christopher Camp Susanna's Porch. Moderate walking in the wooded areas will be required. We recommend good hiking shoes, water and bug spray. You may also want to bring a pair of binoculars.

S2304	Middleton Place Camelia Garden Tour	Tue., Feb. 28	8:45 am – 12:00 pm	Leader: Carol B.
The Gardens, which Henry Middleton envisioned and began to create in 1741 are among the oldest landscaped gardens in America. He followed the principles of classic garden design: rational order, geometry and balance, vistas, focal points, and surprises abound. Over the years a vast collection of camellias, azaleas, tea olives, and crepe myrtles have been incorporated. This is a beautiful garden tour during which we'll learn about its history, design, and the plants themselves. Although spring weather is often dicey, with luck, the camelias should be in full bloom. After our tour, you may wish to stop by the small plant nursery/gift center. Rhizome cuttings of lovely Middleton white ginger lilies seem to be doing well in my garden despite the armadillo.

S2305	Beautiful Yawkey Trip #1	Wed., Mar. 1	7:45 am – 5:30 pm	Leader: Julia
<p>Tom Yawkey, long-time owner of the Boston Red Sox and avid conservationist, willed his munificent South Island Plantation to the SC Department of Natural Resources in what is considered one of the most outstanding gifts to conservation in North America. This property, located on three coastal islands at the mouth of Winyah Bay, consists of pristine marshes, wetlands, ocean beaches, long-leaf pine, and maritime forests. Over the years it has become a refuge for wildlife preservation, providing research, education, field study, and protection for endangered species. Entrance to the refuge is difficult to come by and strictly limited to groups of 14. We'll carpool to the Georgetown area, board a pontoon boat for the 300' ride to the island, then tour by van, stopping once to see the Yawkeys' matching house trailers and retreat. We've run this trip again and again with good reason. Besides being a wonderfully informative tour, the shore and wetlands scenery is magnificent. Bird and waterfowl migration is at its peak during the winter months, which will make this trip particularly interesting. Minimal walking; participants must be able to board the boat via a very short ramp and step up into the van. Bring water and binoculars. Bugs should not be that much of a problem at this time of year but long sleeves, pants, and repellent are recommended. Your fee is a donation to the Tom Yawkey Wildlife Center.</p>

<p>Our "Spectral Adventure" Charleston Ghost Tours is unlike any ghost walk offered in Charleston. Hear tales of ghosts and graveyards, the legends of an ancient city that have only been whispered from generation to generation. This is no history tour in the dark. No "reporting" on hauntings. Instead, as you walk the darkened streets, you will hear tales of decapitation, hanging, live burial, and tragic demise. Some stories are derived from John Bennett's ghastly old Charleston Ghost classic "Doctor to the Dead." 1 ½ hours Moderate walking on darkened uneven streets.</p>

A SINHG perennial favorite, this is one of the best plantation tours around. There will be a lot of walking—wear comfortable, low-heeled shoes (not only for your comfort but also for the protection of old floors and rugs). Because of the long drive time (1 hr. and 50 min) and the number of homes on tour, this is a self-guided trip . Plan you're itinerary and see things at your leisure. Homes will be open from 9:30-5:00. If you've never been to Georgetown, this is a wonderful introduction. Be sure to explore the harbor walk along Front Street and enjoy lunch at one of the town's fun cafes. We'll begin our morning with a short, guided, (easy) walking tour of the woodland gardens, followed by a wonderful, meandering boat ride with a park naturalist. Afterward, you can explore the Butterfly House and gift shop on your own. Picnic tables are available if you'd like to pack a lunch. Here, ancient trees, an abundance of wildlife, and the quiet flow of black water lure photographers and nature lovers from all over the world. We've timed this trip to coincide with peak songbird migration. In particular, this forest is the perfect habitat for migrating Prothonotary warblers—tiny, bright-yellow birds that should be in abundance. Our morning begins with a brief orientation at the visitor center, followed by a guided tour along a 1.75-mile wheelchair-accessible boardwalk. Beidler's naturalists are incredibly knowledgeable; walking is easy and there are many stops along the way. Picnic tables are available if you'd like to pack a lunch.

S2334	Wadboo Creek Kayak Trip	Tue., May 9	8:00 am – 3:00 pm	Leader: Dave
Wadboo Creek ties into the Cooper River up near Moncks Corner and Lake Moultrie. We haven’t been on this trip for over 5 years so it will be a new experience for many Seabrook residents. This area has a lot of history and is where General Francis Marion had supply shacks. Down the creek, we paddle through acres of abandoned rice fields see the old locks that allowed the fields to be flooded, up a rice canal, and view a myriad of aquatic life through the crystal-clear water. The banks are lined with subtropical vegetation. Usually, the birding is extensive with osprey and bald eagle nests in the area as well.
